

# Parc Eugénie

Cannes - France

## THE PROJECT

A real estate operation for the sale of the Parc Eugénie development (sales began in 2011), comprising a total of 54 housing units on five floors. The surface area of the terraces of the apartments varies from 5.40 m<sup>2</sup> to 31 m<sup>2</sup>. designed by the architects Marc Favaro and François Navarro. Plafometal was called on to supply the ceilings of the outdoor balconies and terraces

## THE CUSTOMER'S NEEDS

- Esthetical solutions
- Outdoor installation
- Occasional access to the plenum

## OUR ANSWER

A closed aluminum linear strips solution:

- Outdoor installation is possible, under specific conditions
- Made of Aluminum, for its durability and reduced weight
- Colors are customizable
- Specific means of access to the roller blind boxes

## TYPE F LINEAR STRIPS:

- Designed to be clipped onto a concealed grid.
- 15 mm closed hollow joint between the strips
- Straight sides and square edges

## PRODUCT BENEFITS

- Cost-effective and easy to install.
- Can be used to create long lengths.
- A directional and graphic effect.
- Available in a wide range of colors.
- Can be installed beneath an exterior canopy under certain conditions.
